Evaluation Questions

- What system-level changes (e.g. organizational, inter-organizational, policy, service) occurred?
- How did these changes occur?
- What strategies were implemented? Which types were drivers of change? Which were less effective?
- What contextual factors influenced process and outcomes?
- Which sectors/partners participated in the change effort, and what role did they play?
- How were people with lived experience engaged in the process, and how did their involvement change/grow over time?
- What challenges did grantees experience?
- What supports/training did grantees need to advance their goals?
- What did grantees and the Foundation learn from the process?
